

# ARP 2600 "Skin" sample player

These 16 samples are by default S0.mp3 to s15.mp3  
The first slider is volume- the second is the Pan setting.

16 samples

Plays sample

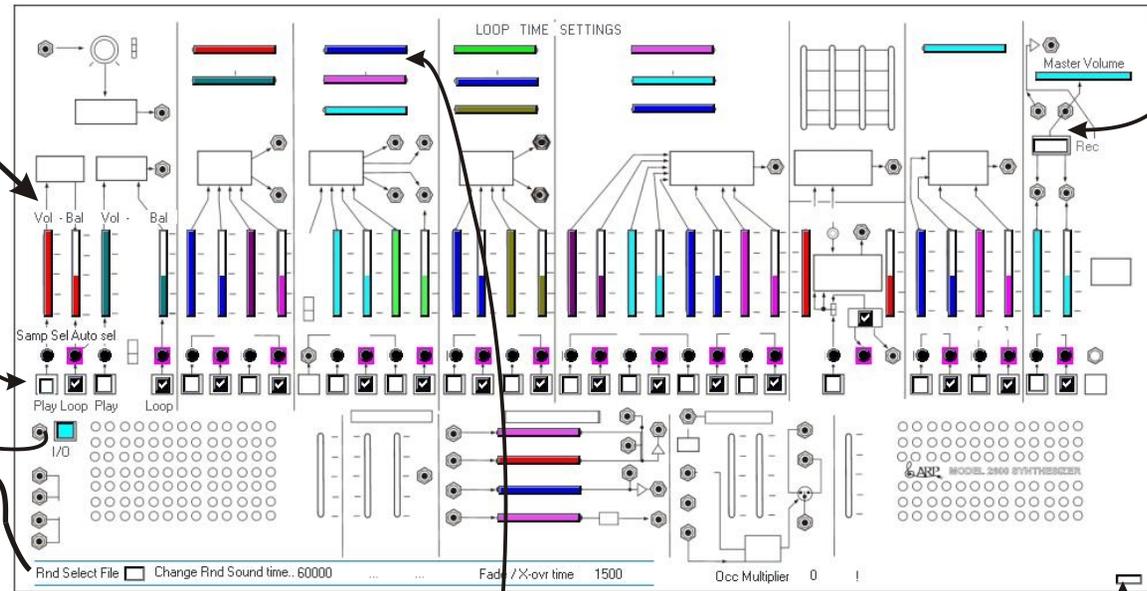

if this is selected sample will loop when complete- otherwise it will stop...

Close Program- Will save any recording..

This will randomly select a file- and change - also crossover between two...  
Also now clicking on the file list will select that file to play

Press to select other sound files

If you press this- Turns red and the samples Will change randomly from those In the folder- shown here- And will change depending on the Loop time settings - sliders...
